

**MSN and MSN NP PROGRAM OUTCOMES**

<b>Master's Program Outcomes</b> (Effective Fall 2024)	
1.	Synthesize new and prior learning for clinical decision-making, policy development, and healthcare leadership.
2.	Analyze population health perspectives in provision of safe, person-centered care to foster optimal health outcomes and well-being for diverse individuals, families, communities, and populations.
3.	Conduct scholarly inquiry using information technology to synthesize best evidence to inform nursing practice, education, research, and policy.
4.	Perform quality improvement initiatives that ensure cost-effective healthcare, promoting a culture of safety at the individual and systems levels.
5.	Refine one's own professional identity through adherence to professional standards of practice and code of ethics.
6.	Create a culture of collaboration across disciplines through transformational leadership.
